

I kindly request the latest complete electronic database of all public and private basic-education schools in Georgia, including preschools and kindergartens where applicable, primary schools, basic/lower-secondary schools, and upper-secondary schools. The information should be provided in Excel or CSV format and contain only the following fields:

School name

Official institutional email address

School type (public or private)

Please include all eligible schools nationwide and exclude universities, colleges, vocational institutions, and other higher-education institutions. I am requesting only publicly available institutional contact information, not personal information about school principals, teachers, or students.

If this information is already publicly available, please provide the direct download link. If not, I kindly request an electronic copy of the existing database, preferably free of charge.
